

PERFECT FOR INCREASING STABILITY AND COMFORT.
NOT SO PERFECT FOR BLENDING IN.

The new DD2™ from Golf Pride is a technically advanced grip that combines a firm core for stability with a soft, gold exterior for comfort and control. Extending to the surface in key areas, the black core material creates a visual thumb placement guide while providing additional stability. The DD2 is designed for all skill levels and provides the superior durability and performance you expect from a Golf Pride grip.
